

Sajjad Hussain

Senior Software Engineer at Systems Limited

Being an admirer of excellence, I'm personally inclined towards technology and gaining knowledge. I believe in technology's ability to bring about positive change in our lives. I strive to be an effective contributor to do my part in bettering the world around us. My professional experience thus far has led me to a better understanding of managing client requirements, development cycles, and effective project delivery. My goal is to be a team lead who works with his team to make breakthroughs and inspire innovation while delivering excellent projects.

Work History

Systems Limited

Mar 2015 - Present (1.8 years)

Senior Software Engineer

Lahore, Pakistan

Title: MDF **Client:**MDF **Team Size:** 6 **Project Duration:** 6 Months

MDF is a web based solution for promotions of event management. As a Software Engineer, I developed Data Migration Scripts in SQL, created new screens, fixed bugs, and developed reports in SSRS. Data was migrated from Oracle to SQL and the application was developed using ComponentOne and SpreadGrid controls. SSRS, SSIS and WCF webservice were also used in development.

Title: VLR **Client:**Visionet **Team Size:** 12 **Project Duration:** 6 Months

VLR Suit is a complete enterprise class solution which facilitates loan review and execution of post-closing business processes. It is a highly configurable and highly extensible workflow system for automating loan review. As a Software Engineer, I am currently responsible for customizing the application according to client requirements. Currently I'm working on different services while developing different modules for new clients.

CurePet

May 2014 - Mar 2015 (10 months)

Software Engineer

Lahore, Pakistan

CurePet Inc is a New York based company which has its software development center based in Lahore. Currently CurePet is developing a one of a kind veterinary Health management system and connecting communities through which Veterinary Doctors, practices, hospitals and pet owners will be able to be synchronized in regards to the pet's/animal's health resulting in cost effective and efficient way to administering healthcare to our furry friends.

Team Size: 20 Project Duration: 9 months

Roles & Responsibilities: Developed reports in SSRS, Developed screens in MVC using Kendo Tools, Services in WCF, Webservices and Windows services, Designed Database, and fixed bugs.

ArhamSoft (Pvt) Ltd.
